

**TVS AIR SPRINGS**  
ENGINEERING COMFORT

# Strong Loads with Superior Control

## Safer Haul-Air suspension designed for easy towing and powerful lifting

TVS AIR SPRINGS are specifically designed for truck lift axle applications, ensuring superior load handling and uniform load distribution during laden conditions. When the vehicle is unladen, they efficiently lift the axle, reducing tyre wear, extending tyre life.

By absorbing vibrations and shocks on rough roads, TVS AIR SPRINGS minimize vehicle wear and tear, enhancing durability. They also provide a smoother, more comfortable ride for drivers, ensuring a reliable and enjoyable driving experience.

THE PREFERRED AIR SPRING SOLUTION FOR LEADING OEMS

S.No.	Part No	Description	Load Capacity	OE Part Number	Application
1	SIAS3418	233CT-2	45kN at 6 Bar	284633909972	Load Air Springs for Tag Axle TATA 14W
2	SIAS6157	379C 1.2	28kN at 6 Bar	620000002954	Load air springs - Bharat Benze 14W
3	SIAS6214	20F	17kN at 7 Bar	41CX008C01/ P1H00003/ B9E00112/ASSY-FD 200-19 840 CT	Lift Air Spring for TATA/AL 14W/12W/16W
4	SIAS7703	20FF	23kN at 7 Bar	508833909902/513233909902	Lift Air Spring for TATA 16W
5	SIAS7704	RLM48-35	36kN at 6.3 Bar	508833909901/513233909901/41CX051C01	Load Air Springs - TATA 16W/10W
6	SIAS7705	RLM48-30	36kN at 6.5 Bar	508833909901/513233909901/41CX051C01	Load Air Springs - TATA 16W/10W
7	SIAS7706	21CF	43kN at 6bar	F1H00358/ F1H03700	Load Air Springs - AL 16W
8	SIAS7707	228CTT2.5	33kN at 6.5bar	F1H02700/ P1H00006	Load Air Springs - AL 14W/12W
9	SIAS7708D	228CTT4.5	32kN at 6.5bar	284633909972/41CX023C01/ ASSY- FD 330-35 915 CT	Load Air Springs - TATA 14W/12W
10	SIAS7709	RLM48-29	35kN at 6bar	620000005997	Load Air Springs - Bharat Benze 16W
11	SIAS7710	20F-2	20kN at 7bar	620000005998	Lift Air Springs for Bharat Benze 14W
12	SIAS7716	RLM48-40	46kN at 8bar	R191253/500248	Load Air Springs - 16W VECV (12.5T)
13	SIAS8018	38C	25kN at 6bar	P1H00002/ B9E00111/ ASSY- FT 330-29 933 CT	Load Air Springs - AL & Mahindra 14W/12W

## ADVANTAGES OF TRUCK AIR SPRING

- Reduces noise and vibration during transit of goods and materials.
- Causes less damage to the surface of the road with high load.
- Saves fuel consumption, helps in lifting the axle as and when required.
- Constructed with high quality materials to reduce impact of abrasions, heat build-up.
